

Improving Habitat on Private Land

Which program is right for you?

The Colorado Division of Wildlife partners with landowners to provide funding, resources and technical expertise for wildlife habitat improvement projects.

Conservation means harmony between men and land. When land does well for it's owner, and the owner does well by his land; when both end up better by reason of their partnership, we have conservation.

When one or the other grows poorer, we do not.

Aldo Leopold
The "Father" of Wildlife Management
